

BRING YOUR OWN DEVICE
(BYOD) AT OXLEY

OVERVIEW

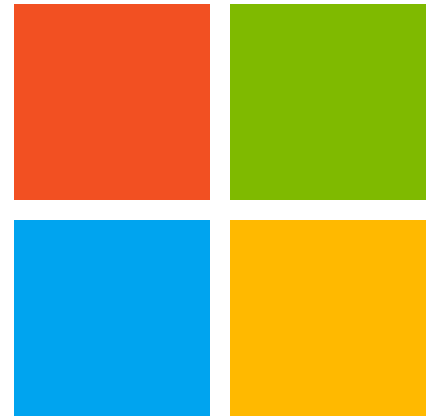

BYOD at Oxley

All students in [redacted] are required to participate in the BYOD programme at Oxley College. This is where a laptop of a minimum standard is supplied privately, onboarded with school software and services such as WiFi and printing. These devices are essential to learning at Oxley and should be replaced

Selecting your device

Choosing and purchasing a laptop can be very confusing, so to create a simpler and efficient process, we have partnered with an experienced education reseller, [TechSource](#), to create a BYOD purchasing portal specifically for Oxley College parents.

It is highly recommended that parents purchase devices through the [BYOD purchasing portal](#). The laptops have been selected to meet and exceed the specifications and are bundled with important additional features; including technical repairs, three-year extended warranty, accidental damage protection and optional loss or theft protection.

Oxley College can only provide limited technical services to devices purchased from other retailers.
